DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-48, drawn to a method for removing excess fluid from a patient via filtration, classified in class 604, subclass 6.09.
 - II. Claims 49-54, drawn to a fluid removal apparatus, classified in class 604, subclass 6.09.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be performed by any apparatus comprising a blood removal device and a filter. The method as claimed does not require the specifics of the claimed apparatus, including the ports claimed by applicant, in order for proper performance. Furthermore, the apparatus may be used to filter blood or another fluid in a manner different than the presently claimed method.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3762

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
